## DESIGN INSPIRATION

The WING series are inspired by the intricate connections between lines. When lines are used to depict objects, their features are clearly visible and become excellent ways to transform simple spaces and create visual focus. The cold lines of the WING series outline the structure model of an open polygon, projecting a strong sense of science and technology and the sense of the future.

## DEVELOPMENT PURPOSE

New multi-functional office chair is developed according to the product iteration cycle to meet the needs of office, conference and other use scenarios, and expand the market share.
